A Focus on Prevention

***“The scope and scale of cardiovascular disease (CVD) is greater than that which can be handled by any one health sector...
... an integrated and coordinated CVD intervention program involving multiple sectors and multiple levels is required to produce a population level impact.”***

A Vision for Champlain

The development of an integrated system of excellence in CVD prevention that acts as a model for Ontario & Canada...

...To ensure the citizens of the Champlain District are the most heart healthy and stroke-free in Canada.

The Challenge...

“Can Johnny come out and eat?”

“Unless effective interventions to reduce obesity are developed, the steady rise in life expectancy observed in the modern era may soon come to an end and the youth of today may live shorter lives than their parents.”

N Engl J Med 2005 Mar;352(11):1138-1145
